ISSN 0267–0836

ISSN 0267–0836

CONTENTS

1 **Microstructural effect of elemental additions Zn, Mg, and Pb on Cd–$CuCd_3$ eutectic**
M. A. Ruggiero and J. W. Rutter

8 **Mass transport of iron in Incoloy 800**
A. R. Paul, M. C. Naik, and K. N. G. Kaimal

12 **Mesotexture in annealed nickel**
J. Furley and V. Randle

20 **Investigation by Rutherford back-scattering spectrometry of tin coatings electrolytically applied on steel strip**
I. Iordanova and K. S. Forcey

24 **X-ray diffraction and infrared spectrometry of thermal oxidation of ferritic stainless steel conversion coatings for photothermal conversion**
L. Aries, J. Roy, T. Bouissou, and R. Sempere

28 **Effect of interrupted accelerated cooling on mechanical properties and structure of vanadium and titanium microalloyed steel bars**
M. F. Mekkawy, K. A. El-Fawakhry, M. L. Mishreky, and M. M. Eissa

37 **Wrinkling behaviour of aluminium sheet during forming at elevated temperature**
A. M. Szacinski and P. F. Thomson

42 **Metallurgical aspects in welding Cr–Mo–V turbine rotor steels**
Part 1 Evaluation of base material and heat affected zone
G. S. Kim, J. E. Indacochea, and T. D. Spry

50 **Solidification sequences in stainless steel dissimilar alloy welds**
H. K. D. H. Bhadeshia, S. A. David, and J. M. Vitek

62 **Effect of superplastic deformation on microstructure, texture, and tensile properties of Ti–6Al–4V**
D. V. Dunford, A. Wisbey, and P. G. Partridge

71 **Influence of thermomechanical processing on martensitic transformation in 10Cr–18Mn austenitic steel**
D. G. Rickerby and G. Piatti

78 **Dynamic softening and static recrystallisation of AISI 321 steel**
P. Kratochvíl, P. Lukáč, P. Vostrý, J. Pacák, and J. Tomeš

83 **Strengthening Nb–V microalloyed steel**
E. E. Wieczorek-Lubuśka

85 **Modelling thermal processing of aluminium alloys**
H. R. Shercliff and M. F. Ashby

97 **Low fracture toughness of desulphurised 0·4C–Cr–Mo–Ni ultrahigh strength steel and its improvement**
Y. Tomita

105 **Bending fatigue strength of carburising steel SS 2506**
S. Preston

111 **Effect of grain boundary composition on tensile strength and hydrogen induced stress corrosion cracking of Ni–20Cr**
J. Küpper-Feser and H. J. Grabke

118 **Calculation of microstructure and hardness of hot rolled steel bars**
B. Jansson, M. Rolfson, A. Thuvander, A. Melander, and C. Wullimann

129 **Effect of intermediate cooling on grain refinement and precipitation during rolling of seamless tubes**
L. N. Pussegoda, S. Yue, and J. J. Jonas

137 **Microstructural refinement of duplex stainless steels**
B. Soylu and R. W. K. Honeycombe

147 **Metallurgical aspects in welding Cr–Mo–V turbine rotor steels**
Part 2 Evaluation of narrow gap submerged arc weldment
G. S. Kim, J. E. Indacochea, and T. D. Spry

155 ***Short Communication*** **Interfacial behaviour of fibre reinforced glass ceramic composite at elevated temperature**
H. S. Kim, J. A. Yong, R. D. Rawlings, and P. S. Rogers

158 **Dynamic recrystallisation and microstructural evolution in Ni_3Al**
G. Gottstein, L. Chang, and H. F. Yung

167 **Influence of temperature on hot rolling textures of aluminium alloys in absence of recrystallisation**
O. Brun, Th. Chauveau, and B. Bacroix

176 **Effect of titanium additions on austenite grain growth kinetics of medium carbon V–Nb steels containing 0·008–0·018%N**
H. Adrian and F. B. Pickering

183 **Micromechanisms of texture development during zone annealing of MA 6000 extrusions**
J. M. Marsh and J. W. Martin

193 **Liquid film simulation of Zener grain boundary pinning by second phase particles**
S. P. Ringer, R. P. Kuziak, and K. E. Easterling

201 **Calculated Al–Ti–Be phase diagram and interpretation of grain refinement results**
W. V. Youdelis and W. Fang

205 **Influence of lithium additions on precipitation and hardening of 6061**
Z. W. Huang, R. E. Smallman, M. H. Loretto, and J. White

213 **Nitrogen solution in molten $Fe_{1-y}M_y$ (M ≡ Al, Mn) analysed using statistical thermodynamics**
N. Shohoji

218 **Comparison of effects of aging on fracture of 9Cr–1Mo and 2·25Cr–1Mo steel**
Part 1 Quenched and tempered material
J. G. Zhang, F. W. Noble, and B. L. Eyre

224 **Comparison of effect of material properties on growth of wrinkles in sheet metal during forming and their removal**
A. M. Szacinski and P. F. Thomson

228 **Influence of carbon on bond strength between nickel and Ni–W alloys**
Xianping Liu, J. Pilling, R. W. Heckel, and J. K. Lee

239 **Solidification microstructure of electrodischarge machined surfaces of tool steels**
L. C. Lim, L. C. Lee, Y. S. Wong, and H. H. Lu

249 **Austenite grain growth during hot forging of medium carbon engineering steels with or without V–Ti microalloying**
R. Kaspar and N. Mahmoud

255 **Simulation of single pass of hot rolling deformation of aluminium alloy by plane strain compression**
S. P. Timothy, H. L. Yiu, J. M. Fine, and R. A. Ricks

263 **Controlling lower temperature recovery and recrystallisation in commercial purity aluminium**
G. J. Marshall, R. A. Ricks, and P. K. F. Limbach

270 **Effect of dispersion parameters and cold deformation on recrystallisation of Al–SiC composites**
Y. L. Liu, N. Hansen, and D. J. Jensen

276 **Effect of microstructure on tensile and fatigue properties of superplastically formed Al–Li–Cu–Mg–Zr 8090 alloy sheet**
A. J. Shakesheff, D. S. McDarmaid, and P. J. Gregson

289 **Synthesis of nitrogen ceramic powders by carbothermal reduction and nitridation**
Part 1 Silicon nitride
Y. W. Cho and J. A. Charles

299 **Effect of martensite morphology on mechanical properties of low alloy steels having mixed structure of martensite and lower bainite**
Y. Tomita

307 **Relationship between decarburisation and fatigue strength of through hardened and carburising steels**
M. J. Gildersleeve

311 **Cleavage fracture behaviour of carbon steels for different ferrite–pearlite contents**
Li Daoming

315 **Comparison of effects of aging on fracture of 9Cr–1Mo and 2·25Cr–1Mo steel**
Part 2 Non-standard microstructures
J. G. Zhang, F. W. Noble, and B. L. Eyre

321 **Influence of ingot structure on properties of commercial purity aluminium under hot testing conditions**
M. Cigdem and G. H. J. Bennett

330 **Al–Pb–Si–In bearing alloy**
D. P. Howe, M. Mee, A. A. Torrance, and J. D. Williams

334 **Design of powder metallurgy aluminium alloys for applications at elevated temperatures**
Part 1 Microstructure of high pressure gas atomised powders
N. J. E. Adkins and P. Tsakiropoulos

341 **Influence of billet processing on properties of extruded aluminium alloy**
N. Raghunathan, T. Sheppard, and Xianhua Yin

353 *Technical Note* **Processing aspects of laser surface alloying of titanium with aluminium**
J. H. Abboud and D. R. F. West

357 **Effect of recovery treatment on recrystallisation of Al–4 wt-%Cu**
S. K. Chang and F. J. Humphreys

360 **Modelling thermal and microstructural evolution on runout table of hot strip mill**
A. Kumar, C. McCulloch, E. B. Hawbolt, and I. V. Samarasekera

369 **Effect of recrystallisation temperature on texture and grain size of Al–SiC composite**
D. Juul Jensen, N. Hansen, and Y. L. Liu

385 **Grain boundary segregation in Nimonic PE16**
S. Dumbill, R. M. Boothby, and T. M. Williams

391 **Constitution of titanium rich alloys of Ti–V–Fe–Al system**
A. I. P. Nwobu, H. M. Flower, and D. R. F. West

399 **Synthesis of nitrogen ceramic powders by carbothermal reduction and nitridation**
Part 2 Silicon aluminium oxynitride (sialon)
Y. W. Cho and J. A. Charles

407 **Electrical properties of rapidly solidified Cu–Cr alloys**
J. Szablewski and B. Kuźnicka

410 **Extrusion of vapour deposited Al–7·5Cr–1·2Fe (wt-%) alloy (RAE Alloy 72)**
R. W. Gardiner, A. W. Bishop, and C. J. Gilmore

419 **Design of powder metallurgy aluminium alloys for applications at elevated temperatures**
N. J. E. Adkins and P. Tsakiropoulos

427 **Energy criterion for high temperature low cycle fatigue failure**
R. P. Skelton

441 **Relationship between microstructure and mechanical properties in metastable β titanium 15–3 alloy**
E. Breslauer and A. Rosen

447 **Structure, mechanical properties, and stress corrosion behaviour of high strength spray deposited 7000 series aluminium alloy**
R. Mächler, P. J. Uggowitzer, C. Solenthaler, R. M. Pedrazzoli, and M. O. Speidel

452 **Laser surface hardening of AISI 01 tool steel and its microstructure**
H. Bande, G. L'Espérance, M. U. Islam, and A. K. Koul

458 **Shortening behaviour of drawn and twisted copper wires**
L. S. Tóth, P. Szászvári, I. Kovács, and J. J. Jonas

464 **Effects of strain rate and matrix structure on transition of toughness of spheroidal graphite cast irons**
K. Nagai, K. Kishitake, and T. Owadano

469 ***Short Communication*** **Influence of grain growth on activation energy measurements for high temperature creep and superplastic deformation of metals and ceramics**
A. H. Chokshi

472 ***Short Communication*** **Preparation and properties of WC–Co textured components**
S. Bartolucci Luyckx and J. Katzourakis

481 ***Overview*** **Development of fracture toughness of ultrahigh strength low alloy steels for aircraft and aerospace applications**
Y. Tomita

490 **Microstructure and mechanical properties of hot pressed Al_2O_3–ZrO_2 ceramics prepared from ultrafine powders**
Q. L. Ge, T. C. Lei, and Y. Zhou

495 **Synthesis of nitrogen ceramic powders by carbothermal reduction and nitridation**
Part 3 Aluminium nitride
Y. W. Cho and J. A. Charles

505 **Constitution of Ti–Al–C alloys in temperature range 1250–750°C**
G. Cam, H. M. Flower, and D. R. F. West

513 **Microstructural evolution during initial stage of high strain rate superplastic deformation in powder metallurgical 7475 Al–0·7Zr alloy**
K. Matsuki, T. Iwaki, M. Tokizawa, and Y. Murakami

520 **Influence of isothermal annealing on fracture behaviour of high chromium superferritic alloys doped with sulphur**
I. M. Wolff and A. Ball

527 **Influence of predeformation on microstructure and mechanical properties of 1020 dual phase steel**
Jingke Liu, Zhonghao Jiang, and Jianshe Lian

533 **Transformation of δ ferrite in type 316 stainless steel weld metal during creep deformation**
M. D. Mathew, G. Sasikala, S. L. Mannan, and P. Rodriguez

537 **Hot deep drawing of titanium sheet**
M. H. Shipton and W. T. Roberts

541 *Technical Note* **Analysis of creep curve by constitutive equations**
V. M. Radhakrishnan

544 **Microstructural evolution in nickel during rolling and torsion**
D. A. Hughes and N. Hansen

554 **Influence of initial microstructure on texture and earing in aluminium sheet after cold rolling and annealing**
A. Oscarsson, W. B. Hutchinson, and H.-E. Ekström

565 **Discontinuous recrystallisation as result of phase transformations**
I. G. Solórzano, J. A. C. Cohn, and R. M. A. de Andrade

577 *Overview* **Characteristics of creep deformation in ceramics**
A. H. Chokshi and T. G. Langdon

585 **Boron and carbon in nickel, iron, and Ni_3Al**
A. H. Cottrell

587 **Solid state phase transformations in Ti–Al–C and Ti–Al–Nb–C alloys**
G. Cam, H. M. Flower, and D. R. F. West

592 **Effect of matrix microstructure on mechanical properties of 2124 aluminium alloy–SiC particle composite**
Zhou Zhao, Xu Yingkun, Wei Wenduo, and Hu Zhuangqi

596 **Influence of SiC particle distribution and prestraining on fatigue crack growth rates in aluminium AA 6061–SiC composite material**
M. Levin and B. Karlsson

608 **Effects of processing parameters on aluminide morphology in aluminium grain refining master alloys**
M. S. Lee and B. S. Terry

613 **Influence of titanium on hot ductility of as cast steels**
R. Abushosha, R. Vipond, and B. Mintz

622 **Influence of roughing rolling passes on kinetics of strain induced precipitation of Nb(C,N)**
E. Valdes and C. M. Sellars

631 **Factors affecting eutectic solidification of Cr–Ni(–Si–Mn) white cast irons**
G. Laird II, R. R. Brown, and R. L. Nielsen

643 **Scanning electron microscopy of liquid metal infiltration of capillaries**
Jung-Ho Ahn and A. Berghezan

649 **Heat flow model for pulsed welding**
P. Ravi Vishnu, W. B. Li, and K. E. Easterling

660 *Short Communication* **Hot deformation behaviour and ledeburite refinement for hypoeutectoid low alloy white cast irons**
Li Hong, Wang Youming, and C. F. Burdett

681 **Role of dislocations and generation of twins during diffusion induced grain boundary migration**
H. Lopez

686 **Stress induced transformation to bainite in Fe–Cr–Mo–C pressure vessel steel**
H. K. D. H. Bhadeshia, S. A. David, J. M. Vitek, and R. W. Reed

699 **Influence of intercritical annealing on strength and impact behaviour of niobium containing steels**
A. Nassar, R. Vipond, and B. Mintz

707 **Multiaxial creep of fine grained 0·5Cr–0·5Mo–0·25V and coarse grained 1Cr–0·5Mo steels**
R. J. Browne, P. E. J. Flewitt, D. Lonsdale, M. S. Shammas, and J. N. Soo

718 **Superplastic behaviour of rapidly solidified ultrahigh carbon alloy tool steel X380 CrVMo 25 9 3**
H. J. Speis and G. Frommeyer

723 **Properties and microstructure of WC–TiC–Co and WC–TiC–Mo_2C–Co(Ni) cemented carbides**
S. K. Bhaumik, G. S. Upadhyaya, and M. L. Vaidya

728 **Wear and microstructural studies of alloy sintered steels**
Q. A. Shaikh, D. S. Coleman, J. Bates, P. D. Nurthen, and P. R. Brewin

739 **Cleavage of tungsten rod**
C. L. Briant

746 **Wear of plain bearing materials with particular reference to role of soft phases**
F. A. Davis and T. S. Eyre

757 **Effect of aluminium in thermal oxidation of Fe–Cr–Al conversion coating for catalysis**
L. Aries, J. Roy, B. Naboulsi, T. Bouissou, and R. Sempere

761 **Bonding by hot extrusion of Incoloy 825 and Duplex 2205 to low alloy steel**
I. Gutiérrez, J. J. Urcola, J. M. Bilbao, and L. M. Villar

770 **Influence of rare earth additions on rheological behaviour of Al–5Cu alloy in solid–liquid coexistence zone**
Li Qingchun, Chen Kuiying, and Zeng Songyan

785 *Overview* **Adhesion in dentistry**
Part 2 Critical review of adhesion to teeth
R. D. Bagnall

795 **Liquid immiscibility in ternary metallic alloys**
M. T. Z. Butt and C. Bodsworth

803 **Novel model for accurate calculation of hardenability and continuous cooling transformation**
R. J. Mostert and G. T. van Rooyen

812 **Composition and lattice parameters of silicide and matrix in cast Ti–Si–Al–Zr alloys**
Zhu Zhang and H. M. Flower

818 **Comparison of static softening in 300 series stainless steels under iso- and anisothermal conditions**
N. D. Ryan and H. J. McQueen

827 **Martensite formation in Ti–Al layers produced by laser surface alloying**
J. H. Abboud and D. R. F. West

835 **Effect of composition on critical (cold working) strain and recrystallised grain size of dilute Al–Fe alloys**
M. Cigdem and G. H. J. Bennett

842 **Carbothermic reduction of ilmenite and rutile as means of production of iron based Ti(O,C) metal matrix composites**
B. S. Terry and O. Chinyamakobvu

849 **Atom probe field ion microscopy of bainitic transformation in 2·25Cr–1Mo weld metal**
B. Josefsson and H.-O. Andrén

853 **Aging at 400–600°C of submerged arc welds of 22Cr–3Mo–8Ni duplex stainless steel and its effect on toughness and microstructure**
J.-O. Nilsson and P. Liu

863 **Interlayer selection and thermal stresses in brazed Si_3N_4–steel joints**
Y. Zhou, F. H. Bao, J. L. Ren, and T. H. North

869 **Spatter and blowhole formation phenomena in pulsed gas shielded metal arc welding**
Y. Takeuchi and T. Shinoda

885 *Overview* **Solidification modelling: current limitations and future potential**
J. Campbell

895 **Microstructure of high strength steel refined with intragranularly nucleated Widmanstätten ferrite**
A. Ali and H. K. D. H. Bhadeshia

904 **Effect of grain refinement and grain coarsening on shapes of dynamic recrystallisation flow curves for C–Mn–Al steels**
B. Mintz, J. J. Jonas, and R. Abu-shosha

915 **Effects of sulphur on hot ductility of niobium containing low carbon steels during low strain rate deformation**
Y. Maehara and T. Nagamichi

923 **Warm rolling of sintered tungsten ingots**
C. L. Briant, F. Zaverl, and E. L. Hall

937 **Influence of extrusion process parameters and texture on mechanical properties of Al–Li extrusions**
G. Tempus, W. Calles, and G. Scharf

947 **Effect of zinc content on processing map for hot deformation of β brass**
D. Padmavardhani and Y. V. R. K. Prasad

954 **Computer model of unidirectional solidification of single crystals of high temperature alloys**
Jia-Chin Liu, Tsang-Sheau Lee, and Weng-Sing Hwang

965 **Influence of intrinsic and extrinsic factors on mechanical properties of 2090 aluminium alloy weldments**
A. J. Sunwoo and J. W. Morris, Jr

981 **Ductile aluminium and brittle trialuminides**
A. H. Cottrell

985 **Influence of kinetic factors on distribution of grain boundary planes in nickel**
V. Randle

991 **Cyclic stress response characteristics and fracture behaviour of aluminium alloy 2090**
T. S. Srivatsan, T. Hoff, and A. Prakash

998 **Effects of shot peening on bending fatigue strength of spring steel SS 2090**
M. Larsson, A. Melander, R. Blom, and S. Preston

1005 **Influence of grain boundary carbide thickness and grain size on cleavage fracture strength and Charpy impact behaviour of steels**
B. Mintz, S. Tajik, F. Kavishe, and T. J. Baker

1010 **Influence of aging condition on tensile and fatigue fracture behaviour of aluminium alloy 6063**
D. M. Jiang, B. D. Hong, T. C. Lei, D. A. Downham, and G. W. Lorimer

1015 **Influence of macroscopic residual stress fields on fatigue crack growth measurement in SiC particulate reinforced 8090 aluminium alloy**
D. M. Knowles and J. E. King

1021 **Identification of intermetallic compounds in thin layers of electrodeposited Cu–Cd alloys using electrochemical techniques**
V. D. Jović, S. Spaić, A. R. Despić, J. S. Stevanović, and M. Pristavec

1031 **Measurement of adhesion of oxides grown on nickel and nickel alloys**
A. Atkinson and R. Guppy

1042 **Slab analysis of roll bonding of silver clad phosphor bronze sheets**
Se-Hyeong Lee and Dong Nyung Lee

1051 **Combined effects of post-weld heat treatment and aging on alloy 800/2·25Cr–1Mo steel joint**
A. K. Bhaduri, S. Venkadesan, P. Rodriguez, and P. G. Mukunda

1057 **Effect of heat treatment on microstructure and mechanical properties of martensitic–ferritic stainless steel containing 17%Cr and 2%Ni**
Liu Ning, Deng Zhonggang, and Huang Menggen

1069 **Cell and band structures in cold rolled polycrystalline copper**
V. S. Ananthan, T. Leffers, and N. Hansen

1076 **Role of valence electrons in phase transformation kinetics of thallium and its dilute alloys**
R. Ahmed and S. Ahmed

1082 **Development of new low nickel, cobalt free maraging steel**
K. T. Tharian, D. Sivakumar, R. Ganesan, P. Balakrishnan, and P. P. Sinha

1089 **Theoretical calculations of kinetics of equiaxed ferrite transformations in Fe, Fe–Ni, and Fe–Cr alloys**
E. A. Wilson

1101 **Influence of sulphur and niobium on hot ductility of as cast steels**
R. Abushosha, R. Vipond, and B. Mintz

1108 **Age hardening behaviour during reverse transformation from martensite to austenite in Fe–31·1 wt-%Ni**
T. Abe and C. M. Sellars

1116 **Microstructures and mechanical properties of milled and continuously cast lead sheet**
Part 2 Mechanical properties
S. Whillock, J. A. Charles, and G. C. Smith

1128 **Erosion–corrosion of preoxidised Incoloy 800H in fluidised bed environments: effects of temperature, velocity, and exposure time**
M. M. Stack, F. H. Stott, and G. C. Wood

1138 **Physical vapour deposition coating processes for encapsulation of powder metal components before hot isostatic pressing**
M. Downing, J. R. Nicholls, and D. J. Stephenson

1143 **Influence of isothermal solidification on microstructural development in Ni–Si–B filler metals**
W. F. Gale and E. R. Wallach
